

Namadgi – Notes on scans

Scanning undertaken on a commercial commercial colour copier & scanner by David Scott c2011.

- OCR'ed and saved to archivable pdfA/2b

Notes:

- The Brumby Running and Surveyor Reports are not quintessentially published oral histories like the Tidbinbilla and Namadgi reports, but based upon a mix of oral history, research and field survey work.
- Quality of all scans is generally poorer than the NPWS/Kosciuszko scans.
- May need to obtain permission to publish from the Tidbinbilla Pioneers Association and National Trust of Australia (ACT branch) which commissioned them through Act & NEGP heritage grants. Believe both they and the author will be enthusiastic to see them available online.
